

Demo pages and useful links

The e-Estonia presentation provides an overview of the pillars that the Estonian information society relies on, including electronic identification, e-services, interoperability and education. To illustrate Estonia's successful e-services, here's a list of some of the public and private services that can be used by logging in with an Estonian electronic ID. Useful links help you find statistics and data on different topics concerning Estonia's digital services.

Demo pages

Tax and Customs Board, tax declaration
