

Erika Piirmets

After living and working abroad, Erika Piirmets has grown to value the perks of living in a digital society that facilitates everyday life. Erika believes in equity and accessibility of government services for every citizen through the best user experience. Having contributed previously to education and youth work, Erika is a strong advocate of automatisisation and proactive services so that people can focus on what matters — interpersonal communication, both professionally and in private — rather than engaging in bureaucracy.

As the Digital Transformation Adviser at the e-Estonia Briefing Centre, Erika's objective is to support spreading the Estonian digitalisation experience and creating bridges to form a network of interconnected digital societies based on decades of Estonia's know-how.

E-Estonia Briefing Centre is a governmental body created in 2009 for the development and promotion of e-Estonia brand. Estonia is the world leader in digitalisation of government services.
